

## Children and Young People's Research Advisory Group

Are you between 10-16 years old and interested in being involved in a research project?

We are a **team of researchers in UCC** and we are looking for children and young people who are migrants or whose parents have migrated to Ireland, to help us to plan and shape a European research project.

The research project is called IMMERSE and it is a European Research project on the integration of refugee and migrant children in education in Europe.

The research project will be for the next 4 years. We are looking for interested children and young people to give us feedback on different parts of the project and help us make sure the project makes sense to children and young people.

If you are interested in helping with the research you can join our ***Children's and Young People's Research Advisory Group***. The group will meet in UCC twice a year and there may be other research activities that members are invited to come to as well.

The first meeting will take place on **Saturday 2<sup>nd</sup> February from 11.30-2.30** in UCC. At this meeting we will tell you more about the research project, have games and activities and provide lunch.

Please contact Jacqui O'Riordan if you would like to attend or would like more information.
